

InduSoft Web Studio - OPC UA Connectivity

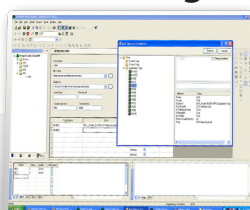

Seamless Data Sharing - OPC Unified Architecture (UA)

As Easy as 1-2-3

① Configure

② Integrate OPC UA Tags

③ Deploy

Securely share information with your controller of choice

1. Configure your process screens
2. Integrate UA tag names (process variables)
3. Deploy your application anywhere in the world

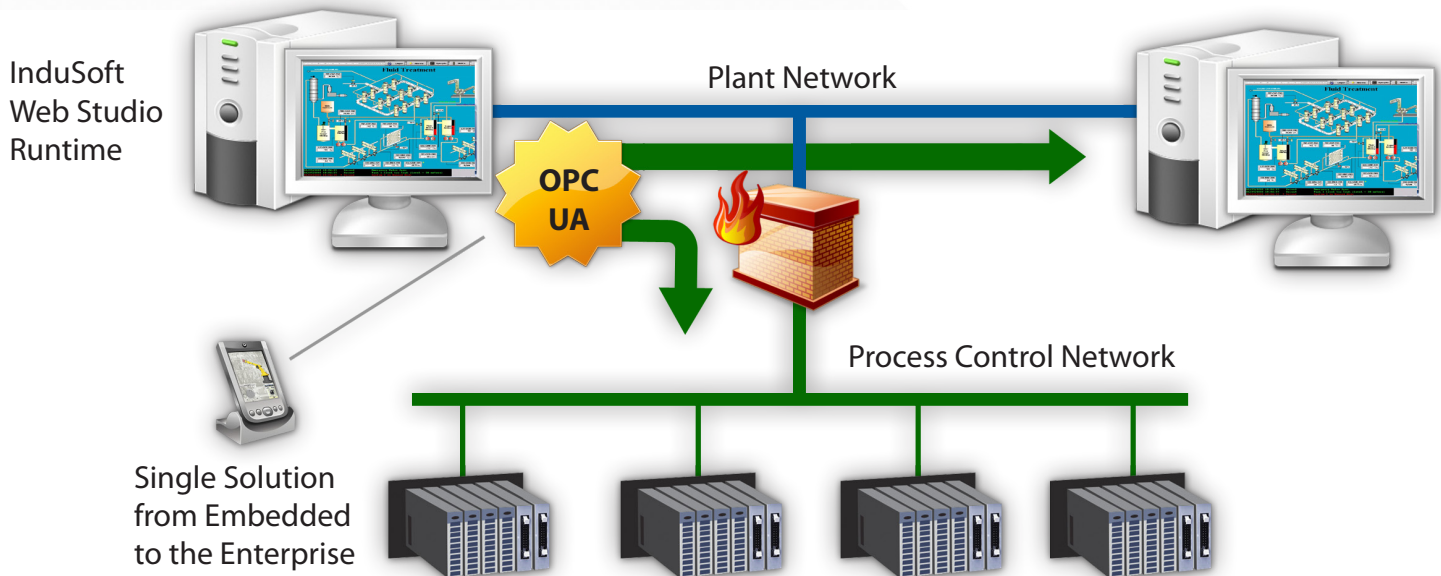

OPC UA delivers secure and reliable real-time and historical data communications via multiplatform automation systems and your enterprise.

**Data seamlessly flows
through many different
operating systems**

Why you need OPC UA and InduSoft Web Studio:

- Trusted intra-machine communication
- Communicate through a firewall to ANY platform or location
- Integrate all of your OPC UA tags in just seconds
- Use as a gateway to other communication standards or networks. Keep existing infrastructure!
- Built on current Windows Communication Foundation

InduSoft Web Studio with Integrated OPC UA

InduSoft Web Studio

- Included Functionality – Graphics, Alarms, Events, Trends, Recipes, Security, Scheduler (calendar), Logging, Two Scripting Languages, Reports, Database Integration, and over 240 Drivers
- Gain Efficiency with Remote access - Connect to your data and application via Internet Explorer, Secure Viewer dedicated browser, or any wireless device with a mobile browser
- Enterprise Integration – Easily communicate with Plant-Floor Devices, MES, ERP, and “back-office” systems using built-in database connectivity to any SQL relational database
- Reduce Downtime – Use open technologies (ActiveX, .NET) to visualize documentation, repair videos or audio messages
- Standards You Trust - .NET, TCP/IP, ActiveX, ADO/ODBC, COM/DCOM, OLE, XML, OPC DA, OPC UA, OPC .NET 3.0

Information Shared: Data where and when you need it

InduSoft Web Studio also supports simultaneous use of:

- OPC DA, “Classic” (Client and Server)
- OPC HDA (Server)
- OPC UA (Client)
- OPC .NET 3.0 (Client) (formerly OPC Xi)
